Forward-Looking Statements

This presentation contains forward-looking statements, including, but not limited to, statements related to Horizon's offer to exchange its ordinary shares for all issued and outstanding shares of Depomed's stock and the potential strategic and financial benefits thereof, the future financial performance and prospects of each of Horizon and Depomed, Horizon's business strategy and plans and other statements that are not historical facts.

These forward-looking statements are based on Horizon's current expectations and inherently involve significant risks and uncertainties. Actual results and the timing of events could differ materially from those anticipated in such forward-looking statements as a result of these risks and uncertainties, which include, without limitation, risks that the conditions to the exchange offer will not be satisfied, Horizon will ultimately not pursue a transaction with Depomed or Depomed will reject engaging in any transaction with Horizon; if the conditions of the exchange offer are satisfied and/or a transaction is negotiated between Horizon and Depomed, risks related to Horizon's ability to complete the acquisition on the proposed terms; the possibility that competing offers will be made; risks associated with business combination transactions, such as the risk that the businesses will not be integrated successfully, that such integration may be more difficult, time-consuming or costly than expected or that the expected benefits of the acquisition will not be realized; risks related to future opportunities and plans for the combined company, including uncertainty of the expected financial performance and results of the combined company following completion of the proposed acquisition; disruption from the proposed acquisition, making it more difficult to conduct business as usual or maintain relationships with customers, employees or suppliers; and the possibility that if the combined company does not achieve the perceived benefits of the proposed acquisition as rapidly or to the extent anticipated by financial analysts or investors, the market price of Horizon's shares could decline, as well as other risks related to the Horizon and Depomed's businesses, including the ability to grow sales and revenues from existing products; competition, including potential generic competition; the ability to protect intellectual property and defend patents; regulatory obligations and oversight; and those risks detailed from time-to-time under the caption "Risk Factors" and elsewhere in Horizon's and Depomed's respective filings and reports with the U.S. Securities and Exchange Commission. Horizon Pharma undertakes no duty or obligation to update any forward-looking statements contained in this presentation as a result of new information except as required by applicable law or regulation.

Note Regarding Use of Non-GAAP Financial Measures

Horizon Pharma provides certain financial measures such as adjusted EBITDA, or earnings before interest, taxes, depreciation and amortization, pro forma net sales adjusted for sales of certain products pre-acquisition and adjusted net income that include adjustments to GAAP figures. Adjustments to GAAP figures as well as EBITDA exclude acquisition transaction related expenses, loss on debt extinguishment, as well as non-cash items such as share-based compensation, depreciation and amortization, royalty accretion, non-cash interest expense, and other non-cash adjustments. Certain other special items or substantive events may also be included in the non-GAAP adjustments periodically when their magnitude is significant within the periods incurred. In the case of pro forma net sales, the figures exclude net sales of orphan and oncology products and include net sales attributed to other companies that marketed certain products prior to their acquisition by Horizon Pharma or Depomed, as applicable.

Horizon Pharma believes that these non-GAAP financial measures, when considered together with the GAAP figures, can enhance an overall understanding of Horizon Pharma's and Depomed's financial performance. The non-GAAP financial measures are included with the intent of providing investors with a more complete understanding of the Company's operational results, trends and expectations, including in relation to Depomed. In addition, these non-GAAP financial measures are among the indicators Horizon Pharma’s management uses for planning and forecasting purposes and measuring the Company's performance. These non-GAAP financial measures should be considered in addition to, and not as a substitute for, or superior to, financial measures calculated in accordance with GAAP. The non-GAAP financial measures used by the Company may be calculated differently from, and therefore may not be comparable to, non-GAAP financial measures used by other companies. The Company has not provided a reconciliation of adjusted EBITDA or adjusted net income outlook for future periods to a net income (loss) outlook because certain items that are a component of net income (loss) but not part of adjusted EBITDA and/or adjusted net income, such as the gain (loss) on derivative revaluation associated with convertible senior notes, stock compensation, acquisition related expenses and certain purchase accounting items such as intangibles and step-up inventory, cannot be reasonably projected, either due to the significant impact of changes in Horizon Pharma’s or Depomed’s stock price on share-based compensation, the variability associated with acquisition related expenses due to timing and other factors.

DEPOMED R&D Opportunity?

- Milestone & royalty agreement related to IW-3718 with Ironwood
- Milestone & single digit royalty agreement related to Xartemis XR and MNK-155 with Mallinckrodt
  - Both medicines have been abandoned by Mallinckrodt

“We had been evaluating the performance of XARTEMIS XR. And certainly, as the company has changed its focus to autoimmune rare diseases in the hospital sector, our emphasis on the office space pain activities has certainly been less strategic. And so in light of that change in strategic direction, coupled with the performance of XARTEMIS XR, as of June, we have discontinued promotion of XARTEMIS XR, and we’re considering a number of different strategic alternatives for that product.”

- Mark Trudeau
  CEO Mallinckrodt, August 4, 2015

…”called MNK-155, and it’s a combination product of hydrocodone and acetaminophen with similar technology to that of XARTEMIS XR. And again, it would be focused on the office space pain marketplace, which, as I mentioned, is not really a strategic focus for us going forward.”

“Viewing the proposed Depomed transaction within that broader context of Horizon’s evolution, we believe this transaction makes exceedingly good strategic sense, is nicely value creating and provides enhanced and durable diversification.”

Cowen, Horizon

“Per our earlier note, we believe the asset is worth more in the hands of Horizon given the greater S&M resources Horizon could provide, cost savings opportunity, ability to refinance the 10.75% debt and expected reduction of the tax burden.”

RBC, Depomed

“We continue to view a HZNP-DEPO combination as attractive, and believe HZNP has made a strong case to DEPO shareholders.”

Stifel, Horizon

“The debate whether Depomed overpaid for Nucynta is yet to be determined, but we believe this is a growth product and the numbers work better within Horizon with the significant tax advantages.”

Guggenheim, Horizon

“As of 6/30/2015, Horizon Shareholders Owned 66% of Depomed’s Outstanding Shares.”

Depomed Continues to Work Against the Best Interests of Shareholders

- Horizon Pharma believes that Depomed will do whatever it can to delay Depomed’s shareholders from expressing their views on Horizon Pharma’s proposals
  - On July 12th, Depomed’s board adopted the Poison Pill
  - That same day, Depomed’s board amended the Depomed bylaws to allow the Depomed board to delay any special meeting of Depomed shareholders to vote on any Horizon Pharma proposals for almost five months
  - On August 21st, Depomed informed Horizon Pharma that it was not allowing Horizon Pharma to hold a single special meeting to hear all of its proposals without incurring further delays
  - On August 31st, Depomed informed Horizon Pharma that it had set the record date for determining shareholders eligible to call the first special meeting as October 29, 2015, 87 days after the initial request and the SECOND TO LAST possible day that it could under the Depomed bylaws
  - On September 15th, Depomed informed Horizon Pharma that it had set the record date for determining shareholders eligible to call the second special meeting as November 13, 2015, 86 days after the initial request and the THIRD TO LAST possible day it could under the Depomed bylaws
Depomed Continues to Work Against the Best Interests of Shareholders

  - Special meeting request could have happened July 9\textsuperscript{th} and the special meeting would have already been called
